**caffè europa touch**

# EVERY BREAK TELLS A STORY

Designed to elevate the daily ritual of the coffee break, **caffè europa touch** combines sleek design with advanced functionality in one seamless, intuitive experience.

Backed by 65 years of know-how, partnerships with industry experts, Rhea has created a machine capable of delivering a wide variety of beverages to meet the diverse tastes of consumers around the world.

The 15" touch display is the heart of the experience: an interactive interface that allows users to choose from a wide range of recipes, while also displaying images, videos, and messages, transforming the break into a more engaging moment.

The customizable upper panel can be tailored to reflect the identity of the brand or to match the aesthetics of the location where the machine will be placed. The three front LEDs light up intermittently during dispensing, adding a dynamic touch to the user experience.

**caffè europa touch** integrates technologies that elevate every beverage:

- Variflex: an adjustable brewing unit with an infusion chamber that adapts to the precise amount of ground coffee required for each recipe.
- Rotary pump: ensuring fast, stable, and quiet dispensing.

Its modular configuration can house up to six canisters for soluble products and one dedicated to coffee beans. An instant-only version is also available. The machine includes two cup turrets, making it possible to serve beverages in two cup sizes: 70 mm and 57 mm in diameter.

The **rhealive** telemetry platform (available starting from June 2026) enables real-time monitoring, remote updates, and adjustments. This system improves efficiency, ensures service continuity, and simplifies management operations while reducing intervention costs.

touch screen	15.6"
direct selections	up to 60
width - height - depth	575 x 1830 x 660 mm
colour	black
variflex 45 or 36	✓
boiler	1
boiler capacity	0.65/0.8 l
max no. canisters	7
max no. mixing bowls	3
configurations	E6 R3/ E7 R3
electrical supply	230 V - 50 Hz
power	1800/2000 W
no. coffee grinders	1
cup turret	1
Ø cup turret	70/73/80 mm
cups/days	up to 80
stirrer dispenser	✓
sugar adjustment	✓
Options	
rhealive platform	available starting from June 2026
